## **DETAILED ACTION**

### ***Specification***

1. The title of the invention is not descriptive. The amended title is still too general. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Bruce (6305947).

Bruce (Figures 1-3B) shows a right-angle connector having an electrically conductive body 26 with a longitudinal section with a cylindrical hollow and a transverse section with four legs 42; an electrical conductive pin with a portion 24 located in the hollow and a second portion 38 extending outwardly from the transverse section and parallel to the legs; and an insulating body 12 surrounding the conductive member and the pin.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nickel (6089885).

Art Unit: 2839

***Response to Arguments***

5. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.
